## ○ Bulla Rotary Switches

Industrial Switches

## INTRODUCTION

Rotary Switches (Pty) Ltd is the first-ever South African company to manufacture and assemble industrial switches locally for the local and overseas markets. The BULLA switch was originally designed and manufactured in 1932 by Schoeller & company of West Germany, from whom we purchased the plant voetstoots and shipped it to South Africa in 1982.

Locally, the switch is manufactured to the same high standard of quality as when it was manufactured in West Germany and, when standard, complies to VDE specifications. On request, the switch can also be manufactured to comply to the following specifications: SEV, CSA, SEMKO, NEMKO, BRITISH LLOYD, etc.

We also manufacture key-operated (6 amp.) and padlock switches as well as spring-return switches for alternating and direct current.

The Bulla switch is widely used and at present we supply to amongst others, the South African Transport Services, Armscor, Escom, the Department of Posts and Telegraphs and major switchboard manufacturers.

## THE BULLA ROTARY SWITCH

- self-wiping
- knife-action
- Quick-make — quick-break

and is used for various applications

- A.C. (8 positions)
- D.C. (4 positions) up to 40 poles.

Our range covers 6 to 12 00 amp. 550 v. and is:

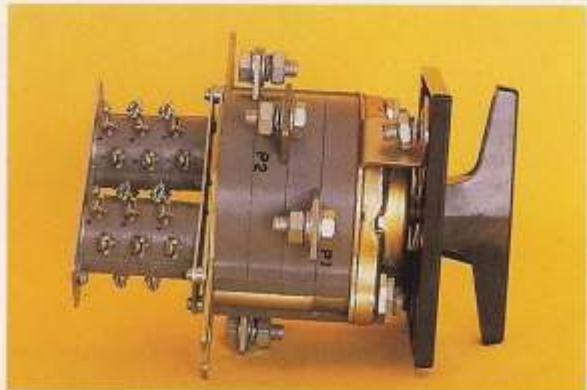

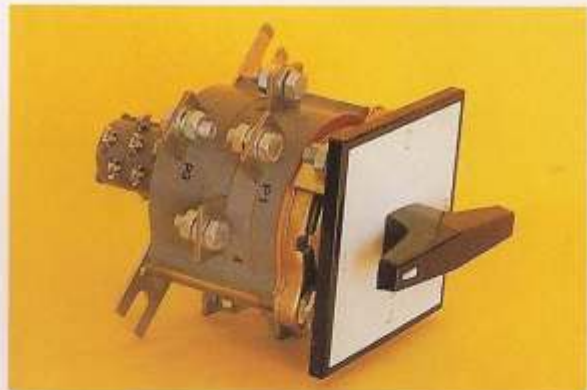

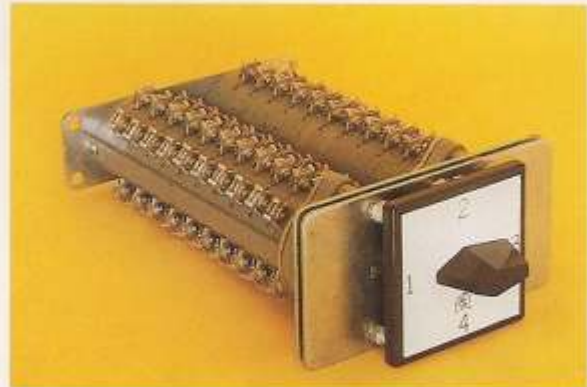

- dust-proof
- spark-proof
- splash-proof

and can withstand temperatures ranging from  $-19^{\circ}\text{C}$ . to  $55^{\circ}\text{C}$ .

Configurations can be done as required.

Our switches cover:

- ammeter and voltmeter
- selectors
- motor control
- series parallel
- by-pass and control switches

Manufacturing of components

Good planning starts on the drawing board. CONTROL SWITCHES offers its customers custom built components to their specific requirements for their own specific needs. Our drawing office is capable of handling all your requirements.

Assembly line of switches

Components are assembled in the subassembly line by highly qualified personnel before moving on to final assembly.

2kv testing

Our large stock, carrying more than 4 000 different items, is your absolute security of our prompt and efficient service.
